A;Title: ATP-binding site in dynein beta-heavy chain: identification by molecular clo
A;Reference number: PSO415
A;Accession: PSO415
A;Accession: PSO415
A;Molecule type: mRNA
A;Molecule type: mRNA
A;Residues: 764-1001, ApQ',1005-2036,'VPSSVET' <OG2>
C;Superfamily: dynein heavy chain, ciliary
C;Keywords: ATP; heterotetramer; hydrolase; microtubule binding; nucleotide binding motif A (P-loop)
F;1852-1859/Region: nucleotide-binding motif A (P-loop)
F;2805-2812/Region: nucleotide-binding motif A (P-loop)
F;1807-2813/Region: nucleotide-binding motif A (P-loop)
F;1807-2813/Region: nucleotide-binding motif A (P-loop)
F;1808/Binding site: ATP (Lys) *status predicted
F;2139/Binding site: ATP (Lys) *status predicted
F;2466/Binding site: ATP (Lys) *status predicted
F;2466/Binding site: ATP (Lys) *status predicted
F;2481/Binding site: ATP (Lys) *status predicted

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   þ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         experimentally infected with larvae originally isolated from experimentally infected dogs. cDNA was constructed and, using adaptors, was cloned unidirectionally into the vector from the EcoRI site to the XhOI site. The library has an unamplified titer of 1 x 10E5 pfu/ml and an amplified, undiluted titer of 9 x 10E11 pfu/ml. The average insert size of the unamplified library is 675 bp (range, 100-1700)."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           /lab_host="XL-I Blue MRF' (Stratagene)"
